

Maths Reasoning: Spring 1 2023

"Doughnut Percents"

Last November, Shepherds (+ Carpenters) had covered fractions, decimals and percentages in their (White Rose) maths lessons. The particular activity that I chose for this Maths Reasoning session, therefore, lend itself conveniently for revision and enrichment of that Autumn 2 topic.

The pupils worked well in their groups, although a few initially found it challenging to communicate with the other players without speaking or using sign language.

It proved to be an enjoyable and enriching session. We will re-visit this, and similar, activities when we knuckle down to KS2 SATs preparation shortly.
