Art Lesson 5

Wow!

We are Designers!

Carpenters Class have been learning about the designer Coco Chanel. Coco Chanel became famous for making simple, easy to wear clothes for women. Her clothes allowed women the freedom to get on with their lives.
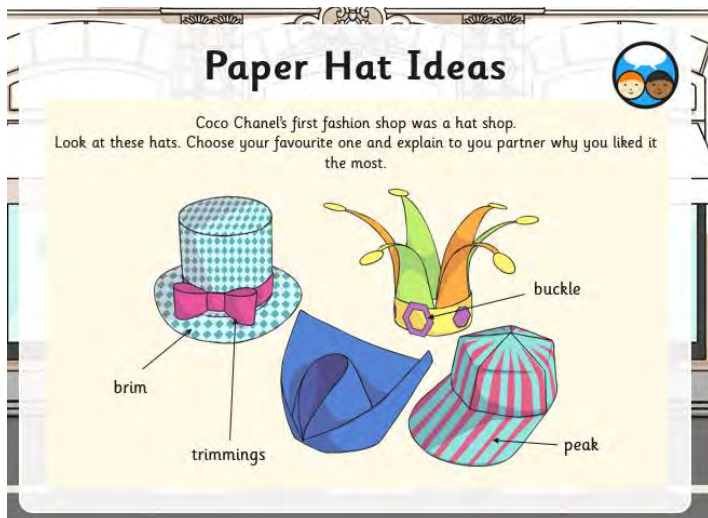

She was called 'Coco' (a nickname) because she used to sing in local cafes. She became well known for a song with the word 'Coco' in the title. The first time that Coco Chanel opened her own shop, she sold hats she had decorated.

The children decided on their design before they started making it. They thought carefully about the size of their hat and base and if they were going to add a peak.

First they watched a video of how to make a peak and then they tried it out themselves.

Next week the children will add the decorations and have a fashion show to show off their finished designs!

The children had great fun creating and then posing in their paper hats!
