

FISHERMAN CLASS

WOW! REPORT

Maths Reasoning Morning: Outdoor Maths

Our focus for this term's maths reasoning morning was 'Outdoor Maths'. For this, we decided to do investigate the insects in our playground and keep a tally of the results. We were very fortunate that some of the children in Shepherds Class were able to join us for our investigation. The children were able to apply their knowledge of tally charts to keep a record of the bugs we found, and demonstrated that they were able to interpret the data through class discussion. We couldn't believe how many woodlouse there were - some children found over 100! Great work.
