

Wow!

Maths Reasoning- Outside!

Today we went outside for our maths reasoning lesson.

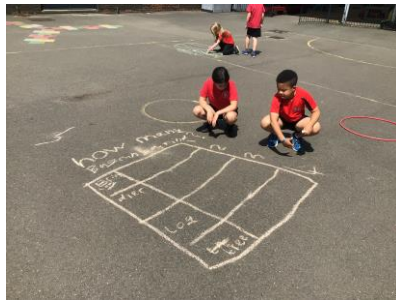

The children were given one piece of chalk as their resource for the lesson, they then went outside for a bug hunt!

The children chose four different areas to look for bugs and then counted how many they found.

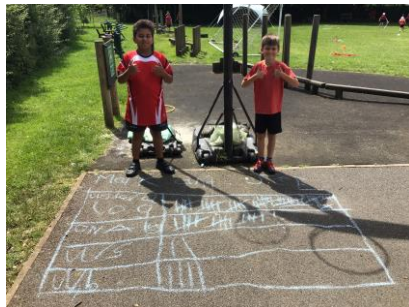

The children worked with their partner to create a tally chart on the playground using their piece of chalk.

At the end of the lesson the children walked around the playground to compare their findings.

Finally, the children recorded their findings using a tally.

Wow! amazing outdoor maths Carpenters class!
