

If the world were a village

Today in Fishermen Class we explored the book "If the world were a village". We explored the 'Earth Village' and found out lots of interesting facts about the demographic of the world.

We found the facts about animals the most interesting and decided to organise this information into graphs.

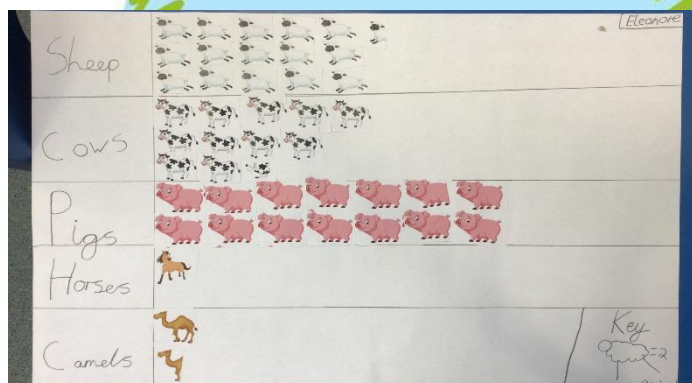

The data

Animal	Number
Sheep	31
Cows	23
Pigs	28
Horses	2
Camels	3
Chickens	2100

Year 2:

In Year 2 we made pictograms to show the information presented in the table. We thought carefully about our key and decided it was too difficult to create a scale to accurately show the number of animals if the chickens were included. For that reason we decided to disregard this information.

Year 3:

In Year 3, we made pictograms to show the information presented in the table. We also thought about the scale and decided it was too difficult to include the chickens and therefore disregarded this information. Here are our results.
