

Connections

Science Week Competition

We hope the children enjoy all the exciting activities we have planned for Science week. This year's theme is 'connections'. I have created an exciting new challenge for you to attempt over the next few weeks. As it's a great opportunity to work together on this as a family, entries will not need to be submitted until we return after the Easter break.

The children need to create an object/presentation that demonstrates connections. The children will all be given an opportunity to present their project to the whole school in a special assembly.

You could:

- Build a bridge of your own or a model of an existing bridge.
- Demonstrate how particles move and connect
- Explain how the brain makes connections
- Demonstrate how magnets work
- Demonstrate how telephones work
- Create an electrical circuit

All participants will be awarded with a certificate and 10 house points for entering. The winner will be awarded the St Marys Young Scientist award. This is a new award that will be presented to a budding scientist every year during science week.

Good luck everyone!
