Wow!

Farmers Class celebrated British Science Week!

Connections

The children had an exciting assembly from Atomic Tom. They learnt how to create a water tornado and explored the properties of air. They also learnt how to make 'elephants' toothpaste' and watched as Atomic Tom created connections with air and liquids.

The children loved their workshop with Atomic Tom where they explored connections through a taste test, listening to their heart beats and exploring their heights.

The children had great fun exploring 'connections' using our classroom equipment. Their challenge of the day was; 'How many different ways can you make connections in our classroom?' Well done Farmers Class, what fantastic connections!
