Our Local Area: Creating a map of the school using a key.

WOW!

Today, the children in Farmer's class followed a map of our school to identify some of the different spaces that we use. The children used a key to colour the main areas such as classrooms, the hall and the playground. Some children also used patterns to identify the trim trail and the outdoor area. The children did a fantastic job of using their maps to find where they were and then following it to as they walked to identify their new location. The children were able to use the keys on their maps to identify some of the locations that we had visited once we had returned to the classroom. We also very much enjoyed saying hello to the rest of our school community as we travelled. Great job Farmers!
