

Shepherds Class- Moving Mechanisms

In DT this term, Shepherds class have been learning about cams, levers and followers.

The children followed a design criteria to design and make a moving toy. They had to ensure that their design met all of the criteria, including having a working mechanism and a moving animal.

The finished products must be appealing and suitable for a child to play with. The children will share their finished models with Fishermen class so that they can complete their evaluations at the end of the unit.
