School Year 2025/2026 Starting School Letter

Dear Parent/Carer,

You may remember that your child had a series of health and growth assessments by the Health Visiting Team during the first 3 years of their life. Health Visitors and School Nurses work together to provide Public Health services to your family from 0-19 years of age.

The School Nursing Service offers a wide range of family health services. We can offer support to you in the following areas:

- Sleep
- Toileting and continence
- Emotional and behavioural regulation
- Nutrition and healthy weight management

During the 2025-2026 academic year, you will receive an SMS link which will invite you to complete your child's Reception Screening Health Questionnaire. This SMS link will go to the mobile number previously registered with us. If you think that this number may now be incorrect, please contact us using the information above to update your details.

To help you think about your child's health needs, we have included some key child development questions below. Please contact us if you feel that you would benefit from support on any of the following points below ahead of completing your child's health questionnaire. We also have a wealth of information and advice about school readiness for children aged between 3 – 5 years and you can access this by clicking on the following link www.nhft.nhs.uk/3-5

- Is speech clear / can others understand them?
- Do they follow simple instructions?
- Are they able to make friends with other children?

- Will they leave you confidently and settle quickly?
- Can they concentrate on activities?
- Do they ask questions and want to learn new things?
- Can they use the toilet and wash their hands?
- Can they use a fork and spoon and drink from a cup independently?

National Childhood Measurement Programme:

During this academic year, your child's class will also take part in the National Child Measurement Programme (NCMP) unless you choose to opt out. The NHS needs to have a good understanding of how children are growing across the country, so that the best possible health services can be provided for them. The information returned to the National Child Measurement Programme does not include the child's name, date of birth or address; it is simply their height and weight. You will receive a separate letter during your child's reception year regarding this.

Dental Health:

If your child is not registered with a dentist, please look at the NHS Choices Website <http://www.nhs.uk/Service-Search> for local practices that are taking on new patients. Dental care is free for children and has a significant impact on general health. The following website has helpful information on children's dental care <https://www.nhs.uk/live-well/healthy-body/taking-care-of-childrens-teeth/>

Hearing and Vision:

All children are entitled to an NHS funded vision assessment with a local Optician. It is recommended that children have regular eye tests at least once every 2 years. Reduced vision can have an impact on a child's learning and development. A sight test with an Optician is important because many abnormalities are treatable if discovered early but, if left untreated, can lead to vision loss and blindness. For more information please visit www.nhs.uk/childrens-eyes.

If you have concerns about your child's hearing, please talk to your child's teacher so they can move them to the front of the class to better support their learning. You can contact the School Nursing team who can discuss your concerns and advise on the best course of action. You may also seek advice from your GP. The sooner any hearing problem is found, the sooner you and your child will be able to get any treatment and support needed.

Signs of a possible hearing problem can include:

- Inattentiveness or poor concentration
- Not responding when their name is called
- Talking loudly and listening to the television at a high volume
- Difficulty pinpointing where a sound is coming from
- Mispronouncing words
- A change in their progress at school

Immunisations:

Is your child fully up to date with their immunisations? This is an ideal time to get your child up to date if they have missed any of their routine immunisations. If you are not sure, or to book an appointment for any missing immunisations please contact your GP surgery. If you would like to discuss any concerns or questions you have in relation to immunisations, you can speak to our School Aged Immunisation Service by calling 0800 170 7055 option 5.

Medical Conditions in School:

If your child has a medical condition which may require the school to provide medicine, intervention or support; they would benefit from having a health care plan. Please talk to your child's school about their medical needs and if you or school require support to create this care plan, you can contact us via the 0-19 Admin Hub.

Family Hubs:

West Northamptonshire is developing a network of Family Hubs. These offer a range of services for families from 0 to 19, and up to 25 with Special Educational Needs and Disabilities. To find out more about the Family Hub and the services on offer please visit [About Family Hubs | West Northamptonshire Council](#).

The Local Offer for Children with Special Educational Needs and Disabilities (SEND)

Whether your child has a diagnosed condition, is waiting for assessment, or you suspect your child may have SEND, there are help and support services available, to find out more please visit [Local Offer | West Northamptonshire Council](#).

Finally, for any further information relating to the health of children between the ages of 0-19 and you can access helpful advice, support and signposting by using the link below.
